

Backing System Specifications Sheet

Backing System

Backings are fabricated from a sheet aluminum composite. This is a highly durable item made out of metal and plastic.

Backing Thickness

Depending on the weight and size of the overall frame, sheets of either **1/8"** or **1/4"** of aluminum composite are used.

Backing Hardware

We have engineered our backing hardware to latch onto an integrated slot/groove.

Hardware thickness

1/8" thickness

Hardware Screws & Inserts

Our screws are made from stainless steel and brass.

*Note

Depending on the overall weight of the artwork & frame, additional aluminum cleats are added for structural support.

Backing Installation:

1. Loosen screws on hardware
2. Slide in or out hardware
3. Secure hardware to latch onto UniFrame slot.
4. Tighten screws to secure mounting location.
